INDEX

TO THE

HUNDRED AND NINTH VOLUME

OF THE

North American Review.

Baldwin, John D., his Pre-historic Nations, critical notice of, 594 – 596.

Bartlett, John, his Familiar Quotations, critical notice of, 293 – 297.

Bickmore, Alfred S., his Travels in East-Indian Archipelago, critical notice of, 276 – 279.

Browning, Robert, his The Ring and The Book, critical notice of, 279 – 283.

Bushnell, Horace, his Women's Suffrage, critical notice of, 556 – 565.

Chapter, A, of Erie, 30 – 106.

Civil-Service Reform, article on, 443 – 475 — characteristics of President Grant, and opportunities at the beginning of his administration, favorable to reform of the civil service, 443, 444 — selection of the Cabinet, 444 — instructions concerning removals from office, 444 — why they were not carried into effect, 445 — manner in which the President's plans were at last defeated, 445 – 447 — administrations from Washington to Jackson really one continuous government, 447, 448 — the first step in the change in the executive power taken during Jackson's Presidency, 448 — the right of local patronage first conceded in principle to Congress by the administration of 1861, 449 — the bargaining for office between Johnson and the Senate, 450 — the power of patronage necessarily makes the members of Congress dishonest, 450 — executive system changed wholly in its nature, 451 — Grant's attempt at reform of more serious magnitude than mere improvement of the civil service, 451 — cruel scenes of private suffering in Washington, 452 — political manœuvres of the Grand Army of the Republic, 453, 454 — Secretary Boutwell's course in the Treasury, 454, 455 — Judge Hoar, his political character, and his course as Attorney-General, 456, 457 — persistence of the lower type of professional politicians in the struggle for patronage, 458 — the country at such a stage that it must either go backward or reform, 459 — no party can carry out a reform, but the people, 459 — story of the effort made by the State Department to improve the consular service, 461 – 472 — *résumé* of the whole subject, 472 – 475.

Dana, Richard H., Jr., his Two Years before the Mast, critical notice of, 298. 299.

De Costa, B. F., his edition of Pre-Columbian Discovery of America, critical notice of, 265 – 272.

De Saulcy, F., his *Etude d'Esdras et de Néhémie*, critical notice of, 272 – 276.

England, the Poverty of, article on, 122 – 154 — Lord Granville's optimistic view of the social condition of England, 122 — different view of president of Poor-Law Board, 122, 123 — extreme poverty of working classes, 123 — distribution of incomes in upper and middle classes, 124, 125 — wages received by working class, 125 – 128 — inequality between rich and poor increasing, 129 — the reasons of this, 130, 131 — uselessness of urging moral considerations upon the very poor, 132 — Mr. John Simon on sanitary neglect, 133 – 135 — on the feeding of lower classes, 136 – 138 — the houses of the poor, 139 – 142 — condition of education among the rural poor, 143 – 146 — the army of paupers recruits from the laborers, 147 — estimates of amounts spent yearly in relief of poor, 147, 148 — inability of poorer classes to raise themselves, 149 — responsibility of the prosperous and powerful, 149, 150 — the laws of political economy not able alone to regulate the relations of men, 150 – 152 — two great remedies which have been proposed, 152, 153 — education of rich as well as poor must be the foundation of improvement, 153.

Egypt, coast of, and the Suez Canal, article on, 476 – 509 — the manner in which deltas are formed, 476, 477 — the deltas of tideless seas, and of seas subject to strong tides, 477 — littoral cordons, 477, 478 —

the most advanced point of the Nile delta, 479 — search of the author for the central point from which the Nile delta has advanced, 479, 480 — "sand-islands" north of Cairo, 481, 482 — traces of marine productions beneath the sand of Lower Egypt, 481, 482 — calcareous rocks of the shore west of Abou-Kir, 483 — character of the Egyptian beech-sands, 483 — lagoon district of the delta, 484 — no proof obtained that the Red Sea and Mediterranean were ever connected, 484 — theory of difference of level of Atlantic and Mediterranean Seas, 485 — table of specific gravities, 486 — easterly current along the Egyptian coast, 486 — not a dangerous coast, 486 — prevailing winds, 486, 487 — length and route of the ship-canal, 487 — character of the country through which it passes, 487 — climate, 488 — rain and "khamseen," 488 — harbor of Port Saïd, and length and direction of moles, 488, 489 — statement of similar works in other waters, 489 — effect of the long mole upon the sands of the shore-line, 490, 491 — inroads of sand in the harbor itself, 491 — material of, and manner of building, the piers, 492 — comparison of fascines and smooth beton blocks, 493, note — size of artificial blocks at Port Saïd and at other works, 494 — material of which they are made, 494 — area of the harbor of Port Saïd, 495 — the city, 495, 496 — table of dimensions of the canal, 497 — character of the material through which it is cut, 498, 499 — barrier of El Guisr, 499 — ancient canal of Necos, 500 — Lake Timsah, 500 — fresh-water canal, its effects upon vegetation, 501 — movable dunes about Lake Timsah, 502 — effective velocities of running water, 503 — barrier of Serapéum, 503 — the Lacs Amers, 504 - 506 — route from Lacs Amers to the barrier of Chalouf, 506 — the barrier of Chalouf, 507 — course from this barrier to Suez, 507 — roadstead of Suez, 508 — winds, channel, and currents of the Red Sea, 508, 509 — Suez Canal the largest ever made, 509 — no co-operation on the part of the Egyptian or Turkish governments, 509.

Erie, A Chapter of, article on, 30 - 106 — the vices and abuses of the past confront us in the present under new names, 30 — illustrated in the Erie wars of 1868, 31 — checkered history of Erie Railroad, 31, 32 — Mr. Drew as director of Erie Railway, bear of Wall Street, treasurer of Erie Railway, 32, 33 — his operation in 1866, 33, 34 — the fiduciary position of a treasurer, 34, 35 — points of resemblance and of contrast between Vanderbilt and Drew, 35 - 37 — Vanderbilt's management of Harlem and Hudson River Railroads, 37 — accepts control of Central, 38 — tendency to consolidation illustrated by the great railroad combinations of later years, 38 — Vanderbilt's efforts to get control of the Erie Railway, 39 — opposed by Drew, and Boston, Hartford, and Erie Railroad, 40 — Drew and Vanderbilt form an alliance, 40, 41 — story of a "pool," 41, 42 — the conflict between Vanderbilt and Drew, 43 — proceedings of the courts, 45 - 59 — excitement caused by reports that Mr. Drew was to be kidnapped, 60 — the Erie Railway made a corporation of New Jersey, by legislature, 60, 61 — corruption of New York Legislature, 62, 63 — Erie Railway in the New York Assembly, 63 - 72 — defeat of Vanderbilt, 72 — amicable negotiations between Drew and Vanderbilt, 73, 74 — details of their treaty, 74, 75 — condition of Erie when it fell into the hands of Fisk and Gould, 76 — political and financial alliance of Tammany ring with Erie ring, 78 — process of procuring monetary stringency in New York, 78, 79 — extraordinary inflation of Erie stock, 79, 80 — interference of Secretary McCulloch, 81 — Mr. Drew appears on the stage again, and is hopelessly cornered, 82 — his humiliation before Fisk and Gould, 83, 84 — the matter again before the courts, 84 - 100 — another corner, 86 - 88 — Judge Davies's course as receiver, 93, 94 — Mr. Fisk's hurried journey to Binghamton, 95 — action against Mr. Bowles, 101 — the Erie and Vanderbilt in active alliance, 102 — decay of our social edifice, 103 — despotism of corporations, 104, 105 — danger for the future, 105, 106.

Evans, E. P., his *Abriss der deutschen Literaturgeschichte*, critical notice of, 606 - 609.

Grape-Culture, Open-air, article on, 155 - 175 — rapid progress of grape-culture in United States, 155 — its past history, 156 — account of various American varieties of grape, 157 - 159 — hybrids, 160 — varieties recommended for out-door cultivation, 161, 162 — soil and cultivation, 162, 193 — fertilizers recommended, 163 — training and pruning, 164, 165 — grafting, 165 — diseases of the vine, 166 — profits of grape-culture, 167 — its literature, 168 — American wines, their growing value, and rank of different varieties, 168 - 172 — the question of adding sugar to acid grape-juice, 172 — price of American wines, 173 — experimenters working for new varieties, 175.

Greece, Ancient, the Religion of, article on, 106 - 121 — comparative mythology partial and incomplete, 107 — principles of investigation of Karl Ottfried Müller, 197 — difference between Hebrew mythology and Christian monotheism, 108, 109 — pure fetich-worship not unknown among the Greeks, 109 — difference

between the Greek and Roman idea of gods, 110 — Greek religion *essentially* polytheistic, 110 — two classes of myths, 111 — three points of view of the Hellenic faith, 111 — Aryan origin of the earliest Greek religion, 111, 112 — universality of the worship of Zeus, 112 — antiquity of name and of eminence not necessarily equal, 112 — the pantheon full of change and development, 113 — the fully developed gods have elementary spirits or demons, 113, 114 — fidelity of the Greeks to their old gods, 115 — two classes of religious epochs, — first introduction of foreign gods, 115 — derived principally from the Phœnicians, 115, 116 — influence of the Egyptians, 116, 117 — the worship of Apollo, 118 — mysteries of Dionysus and Demeter, 118 - 120 — elasticity of polytheism, 120, 121 — the religious need of the seventh and sixth centuries before Christ, 121.

Hazard, Mr. Rowland G., The Writings of, article on, 367 - 391 — an anti-protectionist, 369 — collection "Our Resources," 369 - 371 — "Finance, and Hours of Labor," 371 — "Essay on Language," 371 - 376 — language of poetry, 371, 372 — distinction between abstraction and ideality, 373 — language of the future life, 373 — influence of ideality on character, 374, 375 — mutual relations and separate agencies of the poetic and scientific functions of the mind, 375, 376 — no decisive proof of matter as distinct entity, 377 — mind possessed of an original causal agency, 377 — the conditions of *want* and *knowledge* necessary to action of the will, 377, 378 — the creative power of mind the same in kind as that of Deity, 378 — the phraseology of Edwards criticised, 379, 380 — necessity of choice, 380, 381 — Mr. Hazard rejects foreknowledge of God, 381, 382 — the doctrine not opposed to liberty of will, 382 — arguments against Mill's doctrine of causation, 382 - 384 — permanent states of the will, 384 - 386 — criticism of Mr. Hazard's theory of choice, 386 — of the power of contrary choice, 387 - 390.

Hereditary Insanity, article on, 1 - 29 — former hindrances to its study, 1 - 3 — recent methods and facilities for observation, 3, 4 — elements of the brain, and modes of disturbance, 5, 6 — first symptoms of morbid condition of the brain, 7 — hereditary transmission, 8 - 11 — of bodily features, 8 - 10 — mental and moral qualities, 10 — why genius in its highest form is not transmitted, 10 — instruction raises the individual, but heredity the race, 11 — propagation of disease subject to the same laws, 11, 12 — mental disease not generally transmitted in the same form as in the parent, 12 — slight affections of the brain, as headache, the roots of severe forms of mental disease, 13 — morbid movement ending in insanity, is progressive, 14 — some ways in which it is developed, 15, 16 — eccentric people and the "insane temperament," 16, 17 — various manifestations of it, 18 — no part of the mental economy suffers more than the appetites, affections, and emotions, 19 — illustration of this, 20 — general ignorance in regard to the character of mental disease, 22, 23 — organic conditions of insanity the same as those of political and religious fanaticism, 24, 25 — theory (of M. Moreau) that the excitation of nerve-cells producing intellectual greatness is identical with that producing madness, 25 - 28 — proof of such identity wanting, 28, 29.

History, The Laws of, article on, 197 - 230 — difficulties attending the study of laws of social changes, 197, 198 — progress the universal law, 198, 199 — unrecognized by the ancients, 199 — the influence of Roman jurisprudence over modern thought, 200, 201 — the hopeful view of Hebrew thinkers, and afterwards of the Christian, 201, 202 — theory of universal and necessary progress, 202, 203 — its unsoundness, 203, 204 — cyclical progression, 205 — doctrine of the "social organism," 205 — critical examination of Dr. Draper's development of the doctrine, 206 - 212 — its arbitrary character, 206 - 208 — Arabic history gives no support to the theory, 209 — no good data for reasoning upon the early state of Asia, 209, 210 — decline of nations not senility, illustrated by Russia, Greece, and Rome, 210, 211 — two objections to Dr. Draper's theory, 212 — the law of organic development in the animal from homogeneity to heterogeneity, 213, 214 — this law equally true of social progress, 215 - 218 — shown in productive occupations, 215 — in government, 215, 216 — in divergences of nations of common origin, 216, 217 — in languages, 217 — Mr. Spencer's definition of life, 219 — the law traced from lowest forms to man, 219 - 221 — applied to the progress of society, 221, 222 — effect of the political isolation of ancient communities, 222, 223 — the law of change in organic beings identical with that of social life, 223, 224 — progress of man from the condition of aggregations of families to collections of individuals, 224, 225 — advance from community to nation, shown by France, 225 — idea of national oneness first reached by the Romans, 226 — advantage of this to Christianity, 226 — beneficial influence of the Roman Church. 226, 227 — personal freedom not recognized among the ancients, 228 — its recognition brought about by the feudal system, Roman Church, and development of industry, 229 — the dif-

ferential element in the phenomena of organic and social development, 230.

Hungary and Roumania, article on, 176 - 197 — the interest of the United States in Hungary twenty years ago, 176 — Lord Palmerston's position, its fallacy, 176, 177 — Hungary a separate kingdom until 1849, 177 — when it struck for greater parliamentary freedom and was defeated, 178 — doctrine of centralized Austria, 179 — attitude of the Viennese, 179 — of the Italian peasantry, 180 — the Ruthenians, 181 — great variety of races in Hungary, 182 - 184 — predominance of the Magyars, 183 — strength of Hungary, even under defeat, 184 — policy of Von Schmerling, 185 — the Hungarians repudiate it, 185, 186 — plans to bring them to terms, 186 — triumph of the Magyars, 186, 187 — plans of Russia against Hungary, 187 — danger from internal separatists, 188 — operations of Mr. Bratiano, 189 — the attempts of the Czars through a long period to gain power over the Danubian Principalities, 190, 191 — annexation of the Crimea, 191, 192 — at present Russia sets Roumania against the Magyars, 192 — social condition of Moldo-Wallachia, 193 — explains the success of Couza, 193 — overthrow of Couza, 194 — Mr. Pano, 194 — race quarrels, their folly, 194, 195 — discourse of Kossuth on "Nationalities," 195, 196.

Indian Migrations, article on, 391 - 442 — purpose of the article, 391 — common type and name of the native Americans, 392 — their occupation of the country at a very remote age, 392 — physical causes which influence migration, 393 — slight knowledge we have of the aborigines of South America, 394 — skill attained by the Roving Indians, 394, 395 — by the Village Indians, 395 — the occupations of the aborigines, 397 — fish the principal article of food, 397 — migrations of men not accidental, but governed by law, 398 — geographical features of North America, prairie areas, 399 - 403 — mountain areas, 403, 404 — forest areas, 405 - 407 — means of subsistence, and centres of population, 407 — region east of the Mississippi, 408 — fable of the origin of the Crane tribe, 408, note — earthworks of the Mound-Builders, 409 - 411, note — country about the head-waters of the Mississippi, 412 — country of the Lower Missouri, 412 — Canada and Hudson Bay territory, 413 — the superiority of the valley of the Columbia for the subsistence of Indian tribes, 414 - 421 — the kamash root and edible moss, 415, note — great number of salmon in the region of Columbia River, 416 — Indian modes of taking and preserving them, 417 - 419 — mild climate of this region, 421 — estimates of the number of Indians upon Columbia River and tributaries, 422 — geographical location of Village Indians, 423 - 425 — their condition at the time of the conquest of Mexico, 425 — Aztec Confederacy, 426, 427 — other nations, 428, 429 — degree of civilization of the Indians of Yucatan and Guatemala, 429, 430 — extent and nature of Indian agriculture, 432 - 436 — irrigation, 434 - 436 — lakes near the City of Mexico, 436, 437 — explanation of the lake once surrounding the city, and its disappearance after the Conquest, 438 - 440 — hindrances to the advancement of Village Indians, 441, 442.

Kinglake, Alexander William, his Invasion of the Crimea, Vol. II., critical notice of, 612 - 619.

Kirk, John Foster, his History of Charles the Bold, Vol. III., critical notice of, 596 - 602.

Language, The Genesis of, article on, 305 - 367 — effects of the conquest of India upon philological knowledge, 305, 306 — happy guesses giving way to scientific principles, 306, 307 — examples of the changes undergone by words in form and in meaning, 308, 309 — enough known now, to proceed to the inquiry concerning the origin of language, 310 — unsoundness of the theory of one primitive language, 310 - 312 — contraction and vocalization of French, Spanish, and other tongues, 313, 314 — "phonetic decay," or integration, 314 - 316 — method of forming inflected words by integration, 317 - 319 — analysis of *twenty*, 319 — of *eleven* and *twelve*, 320, 321 — of *which* and *such*, 321 — examination of the Latin *amatur*, 321 - 327 — primarily reflexive, 322 — the *tu* of *amatur*, 323 — earliest method of forming plurals, 327 — constant and variable roots, 328 — William von Humboldt's classification of language, 329 - 331 — Schleicher's notation, 330 — every language originally of the juxtapositive class, 332 — Humboldt's view of linguistic development adopted by nearly all eminent philologists, 333 — rejected by Renan, 333, 334 — diagram showing languages derived from the Latin, 335 — rapid change of Hindoo dialects, 336 — the lines of division between the three types not clearly traceable, 337 — literary dialect of the Chinese, 337 — agglutination not equally prominent in all secondary languages, 338, 339 — tertiary languages still use the primitive method of compounding roots, 339 — originating new inflections, 340 - 342 — effect of printing upon the integrating-process of a language, 346, 347 — some phenomena of the Semitic languages 348 - 351 — comparison between the older Hebrew and younger Arabic, 349,

— lowly beginnings of language, 352 — all words formed from words of physical import, 353 — derivation of the word *God*, 353, 354 — of *truth*, 355 — discussion of the Bow-wow Theory, 356–367.

Lippitt, Francis J., his Military Treatises, critical notice of, 290, 291.

Lists of Some Recent Publications, 302–304, 620.
